DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 1, 2007 has been entered. The previous rejection is withdrawn pursuant thereto.

2. Claims 56, 57, 60, 61 and 64 are pending. Applicant cancelled claims 1-55, 58, 59, 62 and 63.

Claim Rejections - 35 USC § 103

3. Claims 56, 57, 60, 61 and 64 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson et al., US 6,505,172

Johnson discloses, e.g. Figs 1A-3, a host computer, e.g. 10, plural consumer station, e.g. 20, an industry station, e.g. Distributor sites, 200, and inventions, e.g. products and services being offered.

Johnson does not disclose the term computer program or the particular code from claim 57. However computer programs used to store and retrieve a part of a description of content having similar or dissimilar features, e.g. an intellectual property

item, and the code referenced has been common knowledge in the data processing art. To have provided such for Johnson would have been obvious to one of ordinary skill in the art in view of such common knowledge.

It is noted that Applicant's claim language further reads upon the Automated Patent System used by the Public to search invention databases. The particular language of industry computer stations may be no more than the various servers connected via a network connected to the various searchers consumer stations looking to find the particular descriptions of the inventions via computer program modules used by the United States Patent and Trademark Office (USPTO). To have provided such industry stations for the USPTO would have been obvious to one of ordinary skill in the art.

Applicant's September November 1, 2007 have been reviewed, but are moot in light of the new grounds of rejection.

4. Further pertinent references of interest disclosing forms Applicant's invention of intellectual property, e.g. digital content, is noted on the attached PTO-892.
